

Building an Igloo

Sofia Angelica Perri

Hopkins, February 2011

Sofia Perri, Ingrid Storesletten and Alessandro Perri posing in front of a freshly built igloo in Hopkins, Minnesota in January 2011.

How to build a real Igloo

To build an Igloo you need to find some snow blocks that are hard and you can't break them. Then you put them in a igloo shape and then you get more and more blocks and then when you are done building it you can make a little hole to go inside it. It

might be dark inside so you might need a light to light it up. On Saturday January 29th, 2011 it was my Dad's birthday and we built one in my backyard. It was a lot of fun and the igloo is still there!

Laying out the foundations

Cutting out snow blocks

Igloo is getting higher..

Sofia helping carry snow blocks

Higher and higher..

Almost as high as a grown-up

The roof is on, but where's the door?

The door is built!

And we can get in..

I thought there was an air heater in the igloo because it was so warm inside!

After a whole week
the igloo is still
standing pretty
but there is a lot
of snow on it!

About the author: Sofia Angelica Perri was born in New York and now lives in Hopkins, Minnesota with her brother Ale and her parents. She attends Kindergarden at the Blake school and loves her classmates and teachers. She also likes gymnastics, piano, pink, skiing and igloo building.
